

GO GREEN AND SAVE SOME, TOO!

Non-Aerosol 769 Lubricant[®] and Magic Wrench[®]

Major league sprayers with a new uniform.

To quickly free stuck or corroded parts, you won't find two better penetrants than Jet-Lube's 769 Lubricant[®] and Magic Wrench[®]. Both nonflammable formulas are now available in recyclable non-aerosol packaging.

Who cares?

You do! Now you get better cost-per-ounce pricing. You can store it safely and throw it away wherever you feel like it because you won't need a fire cabinet to store it, an aerosol can-puncturing disposal system, or pay a disposal fee to haul it off. Bottom line: more product without additional disposal fees.

What about performance?

With the adjustable nozzles, you can quickly penetrate, lubricate, and remove moisture from tight spots with a thin stream or spray a wide, nonevaporative, protective, corrosion-resistant film over a broad surface. No skinny tubes to lose - just adjust the nozzle.

Environmentally safe. Silicone free. Excellent for all metals and plastics.
