

DEACON[®]

WMD

Non-Curing Sealant / Packing

WMD is a non-curing, highly compressible, and easily pumpable compound that remains flexible under extreme temperatures and pressures. Its highly lubricous, low-friction properties make it an excellent choice for rejuvenating worn out valve packing, ensuring smooth and reliable performance. WMD provides superior protection against rust, oxidation, and corrosion, while its advanced formulation is specifically designed to reduce or eliminate fugitive emissions in valves.

TEMPERATURE RANGE:

- 40°F to 1200°F (-40°C to 649°C)

BENEFITS:

- Eliminates leaks
- No VOC's
- Rust, oxidation and corrosion protection
- Will not harden, evaporate or dry out
- Easily pumpable
- Allows equipment to remain operational

APPLICATIONS:

- Valves
- Stuffing Boxes
- Flanges
- Enclosures
- Pumps

COMPATIBILITY:

- Alcohols, Benzene, Butane, Carbon Dioxide, Fuel Oils, Hydrocarbons, Hydrogen, Ketones, Steam, Synthetic Gases, and Oils
